About us
We champion great design that improves lives

SITE of the DAY

Home > **About us**

Share

The Design Council champions great design. For us, that means design that improves lives and makes things better.

Design Leadership Programme

Harnessing design to drive growth and improve service efficiency

We work at a senior level with organisations to help them realise the ambitions of the organisation by identifying practical ways that design can deliver tangible long term results.

Our evidence shows...

Two thirds of UK businesses believe that design is integral to future economic performance

Over two thirds of rapidly growing businesses have increased investment in design in the past three years

Businesses that see design as integral don't need to compete on price as much as others

Key research findings

Design can add value by:

> *Driving innovation and opening up uncontested market spaces*

> *Differentiating products and services to attract customers*

> *Strengthening branding, embodying a company's values and improving recognition.*

Who we work with...

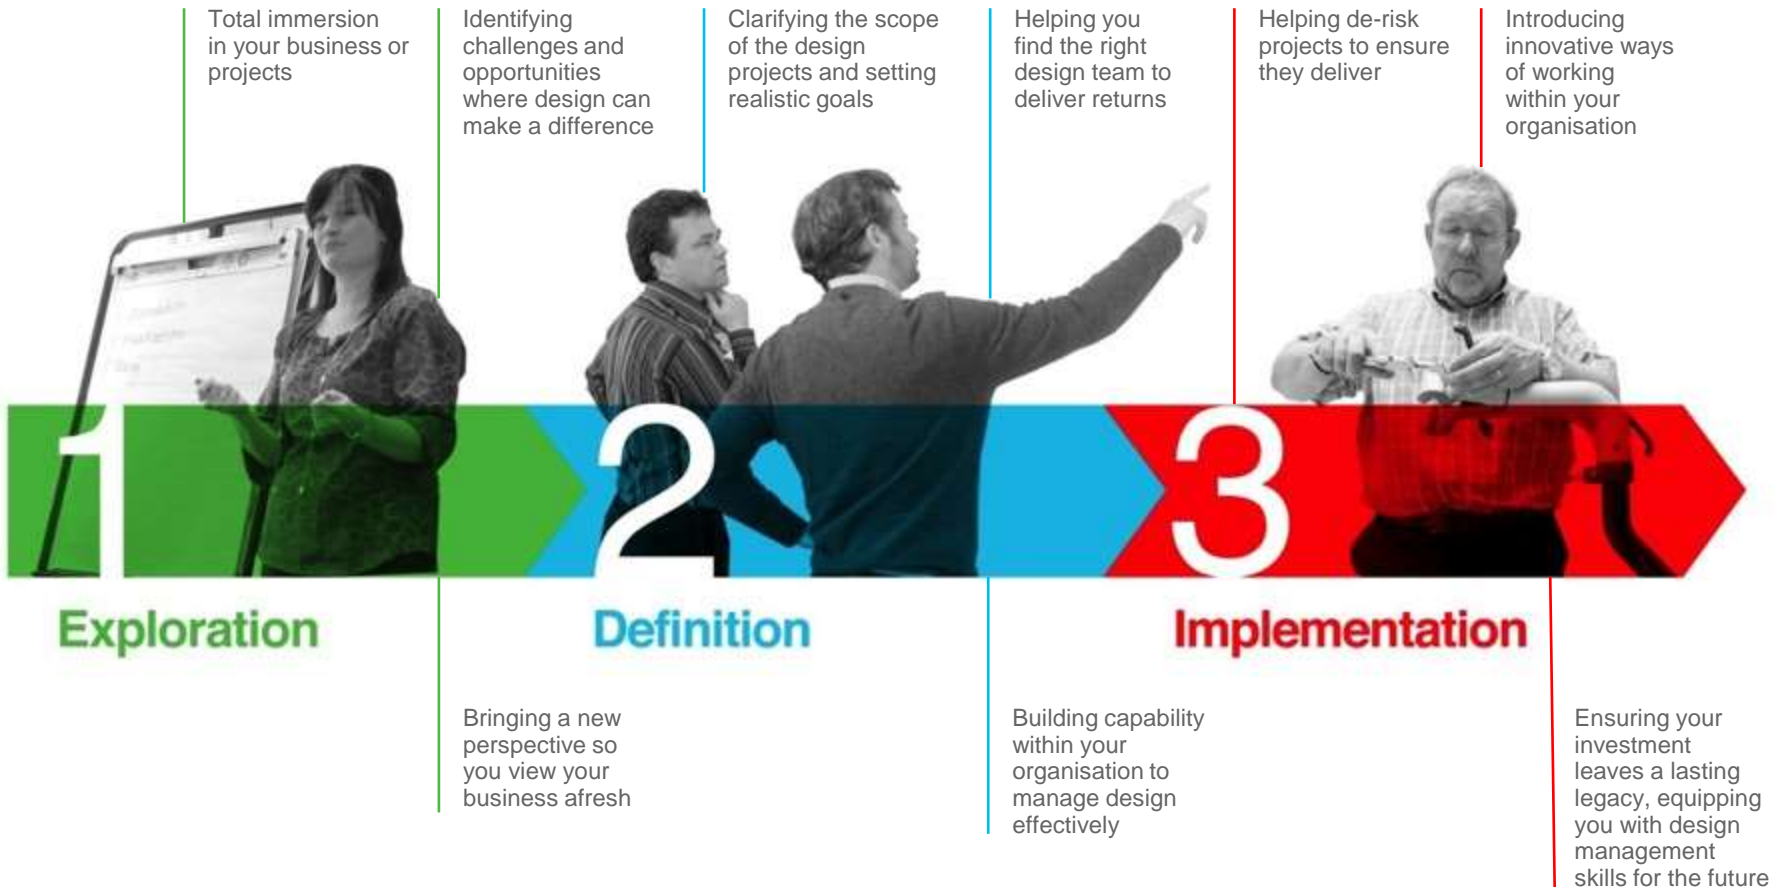

Design Associate Network

A clear and proven process

Structured, using strategic design methods

Total immersion in your business or projects

Identifying challenges and opportunities where design can make a difference

Clarifying the scope of the design projects and setting realistic goals

Helping you find the right design team to deliver returns

Helping de-risk projects to ensure they deliver

Introducing innovative ways of working within your organisation

Exploration

Definition

Implementation

Bringing a new perspective so you view your business afresh

Building capability within your organisation to manage design effectively

Ensuring your investment leaves a lasting legacy, equipping you with design management skills for the future

Impact

Economic evaluation of the impact on the businesses... direct return for every £1 spent on design:

Feedback

said design was integral or important to their businesses

How we work...building awareness and capability

“The programme provided insight into a wide range of business issues, embedding within the company a deeper understanding of the value of user-centred design”

David Repper, Managing Director, James Heal
