

Job Vacancy

Position: Design Engineer
Grade: £18,000 - £25,000
Status: Permanent
Hours: Full Time (36 hours)
Responsible to: Technical Engineering Manager

Movetech UK is a leading provider of creative and practical movement solutions, including industrial turntables and air-film floatation equipment, for many industries and has been solving load moving challenges for commerce and industry since 1959. Movetech UK has been accredited with ISO 9001 and has an established customer base including Rolls-Royce, Waitrose, Asda, BNFL and BAE Systems to name a few. The company is committed to high quality product design, manufacture and installation and it has an established and formal Quality Management System.

As a Design Engineer you will be joining a small but specialised Engineering team in a company where the Technical Department is the core of the business. You will be responsible for producing conceptual design drawings, detailed design drawings, technical documentation, structured bills of materials along with some project management. You will also be responsible for supporting all other areas of the business, such as sales, purchasing, production etc. from a Technical perspective.

You will have a Bachelor's degree in Mechanical Engineering or similar. Post graduate experience is not necessary however undergraduate experience in AutoCAD, Autodesk Inventor and engineering design will be a definite advantage. You will be a confident engineer with a desire for continued professional development and you will be willing to take a prominent role in a small but successful design team.
