

# MMOG/LE

## Improving your communication flows

*“MMOG/LE is a great supply chain resource that can be used not only to assess an organization’s supply chain capabilities, but also to train on the importance of key supply chain processes,”*

*Daniel Howe,  
Global Supply Chain Manager,  
General Motors Company*

Global Materials Management Operations Guidelines/Logistics Evaluation (MMOG/LE) is a global standard of industry best practice for supply chain management processes. A joint collaboration from the automotive standards bodies AIAG and Odette, MMOG/LE is a self-assessment tool that enables suppliers to develop common supply chain management practices.

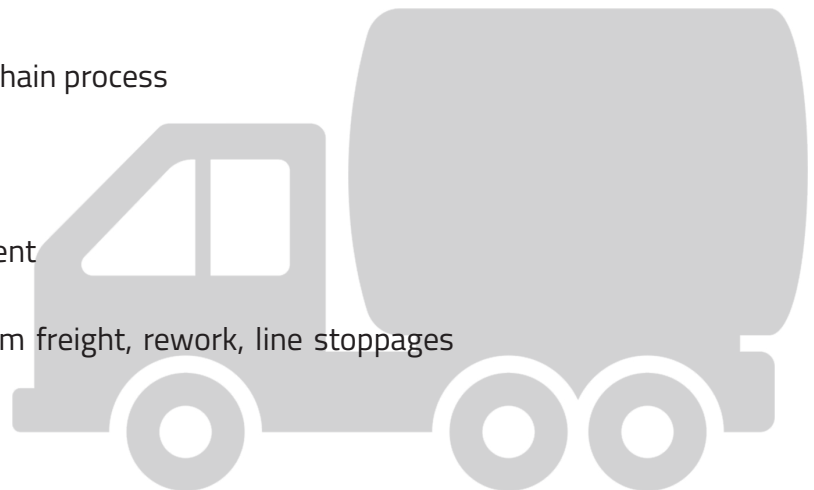

By ensuring that MMOG/LE is rooted in an organisation’s culture and by adopting MMOG/LE best practices across the supply chain, organisations can ensure an effective and efficient communication flow with their customers, suppliers and other trading partners.

### Benefits of MMOG/LE compliancy

MMOG/LE improves materials management efficiency and accuracy while reducing costs from errors and waste. Its benefits extend throughout the supply chain to include valued returns for OEMs, suppliers and customers alike.

MMOG/LE helps organisations to:

- Improve control of the supply chain process
- Reduce supply chain risk
- Increase customer satisfaction
- Increase inventory visibility
- Support continuous improvement
- Increase competitiveness
- Reduce carrying costs, premium freight, rework, line stoppages and lead times

## MMOG/LE and EDI

MMOG/LE compliance requires an EDI (electronic data interchange) system to facilitate and automate the electronic exchange of order and delivery documents between trading partners.

An EDI system is required to comply with the following MMOG/LE concepts:

### Inventory barcoding

To track inventory, speed up replenishment and provide real-time visibility of inventory

### Automated customer data entry

All customer data is automatically integrated into the supplier's planning system without manual intervention or the use of spreadsheets.

### Electronic ordering with sub-suppliers

Sub suppliers receive electronic schedules and send back electronic advanced shipping notifications (ASNs)

## About Data Interchange

Data Interchange is a leading provider of electronic data interchange (EDI) and information solutions for global organisations specialising in automotive, manufacturing, logistics and local government.

## Data Interchange helps you become MMOG/LE compliant

Data Interchange is a leading provider of sector-agnostic, EDI and integration solutions to over 4,000 global organisations. Data Interchange is an active member of both Odette and AIAG and a leading contributor to the MMOG/LE V4 standard, through the provision of our automotive industry experts.

Automating the traditional, manual processes involved in supply chain management is our speciality and we have a portfolio of solutions to support your MMOG/LE and EDI needs. Whether you need a simple, standalone EDI solution, or a more sophisticated, ERP integrated solution, we can help you become MMOG/LE compliant.

### The next step
