

Can your products help lower the emissions of tomorrow's vehicles?

If so, you need to attend LCV2016, 14 & 15 September, Millbrook

The Cenex Low Carbon Vehicle (LCV) event is the UK's largest trade show for low carbon vehicle technologies. All the leading figures in the UK low carbon vehicle sector attend LCV, so if your business has products for the automotive industry's low carbon future and you want to meet customers who need your products, then you must exhibit at LCV.

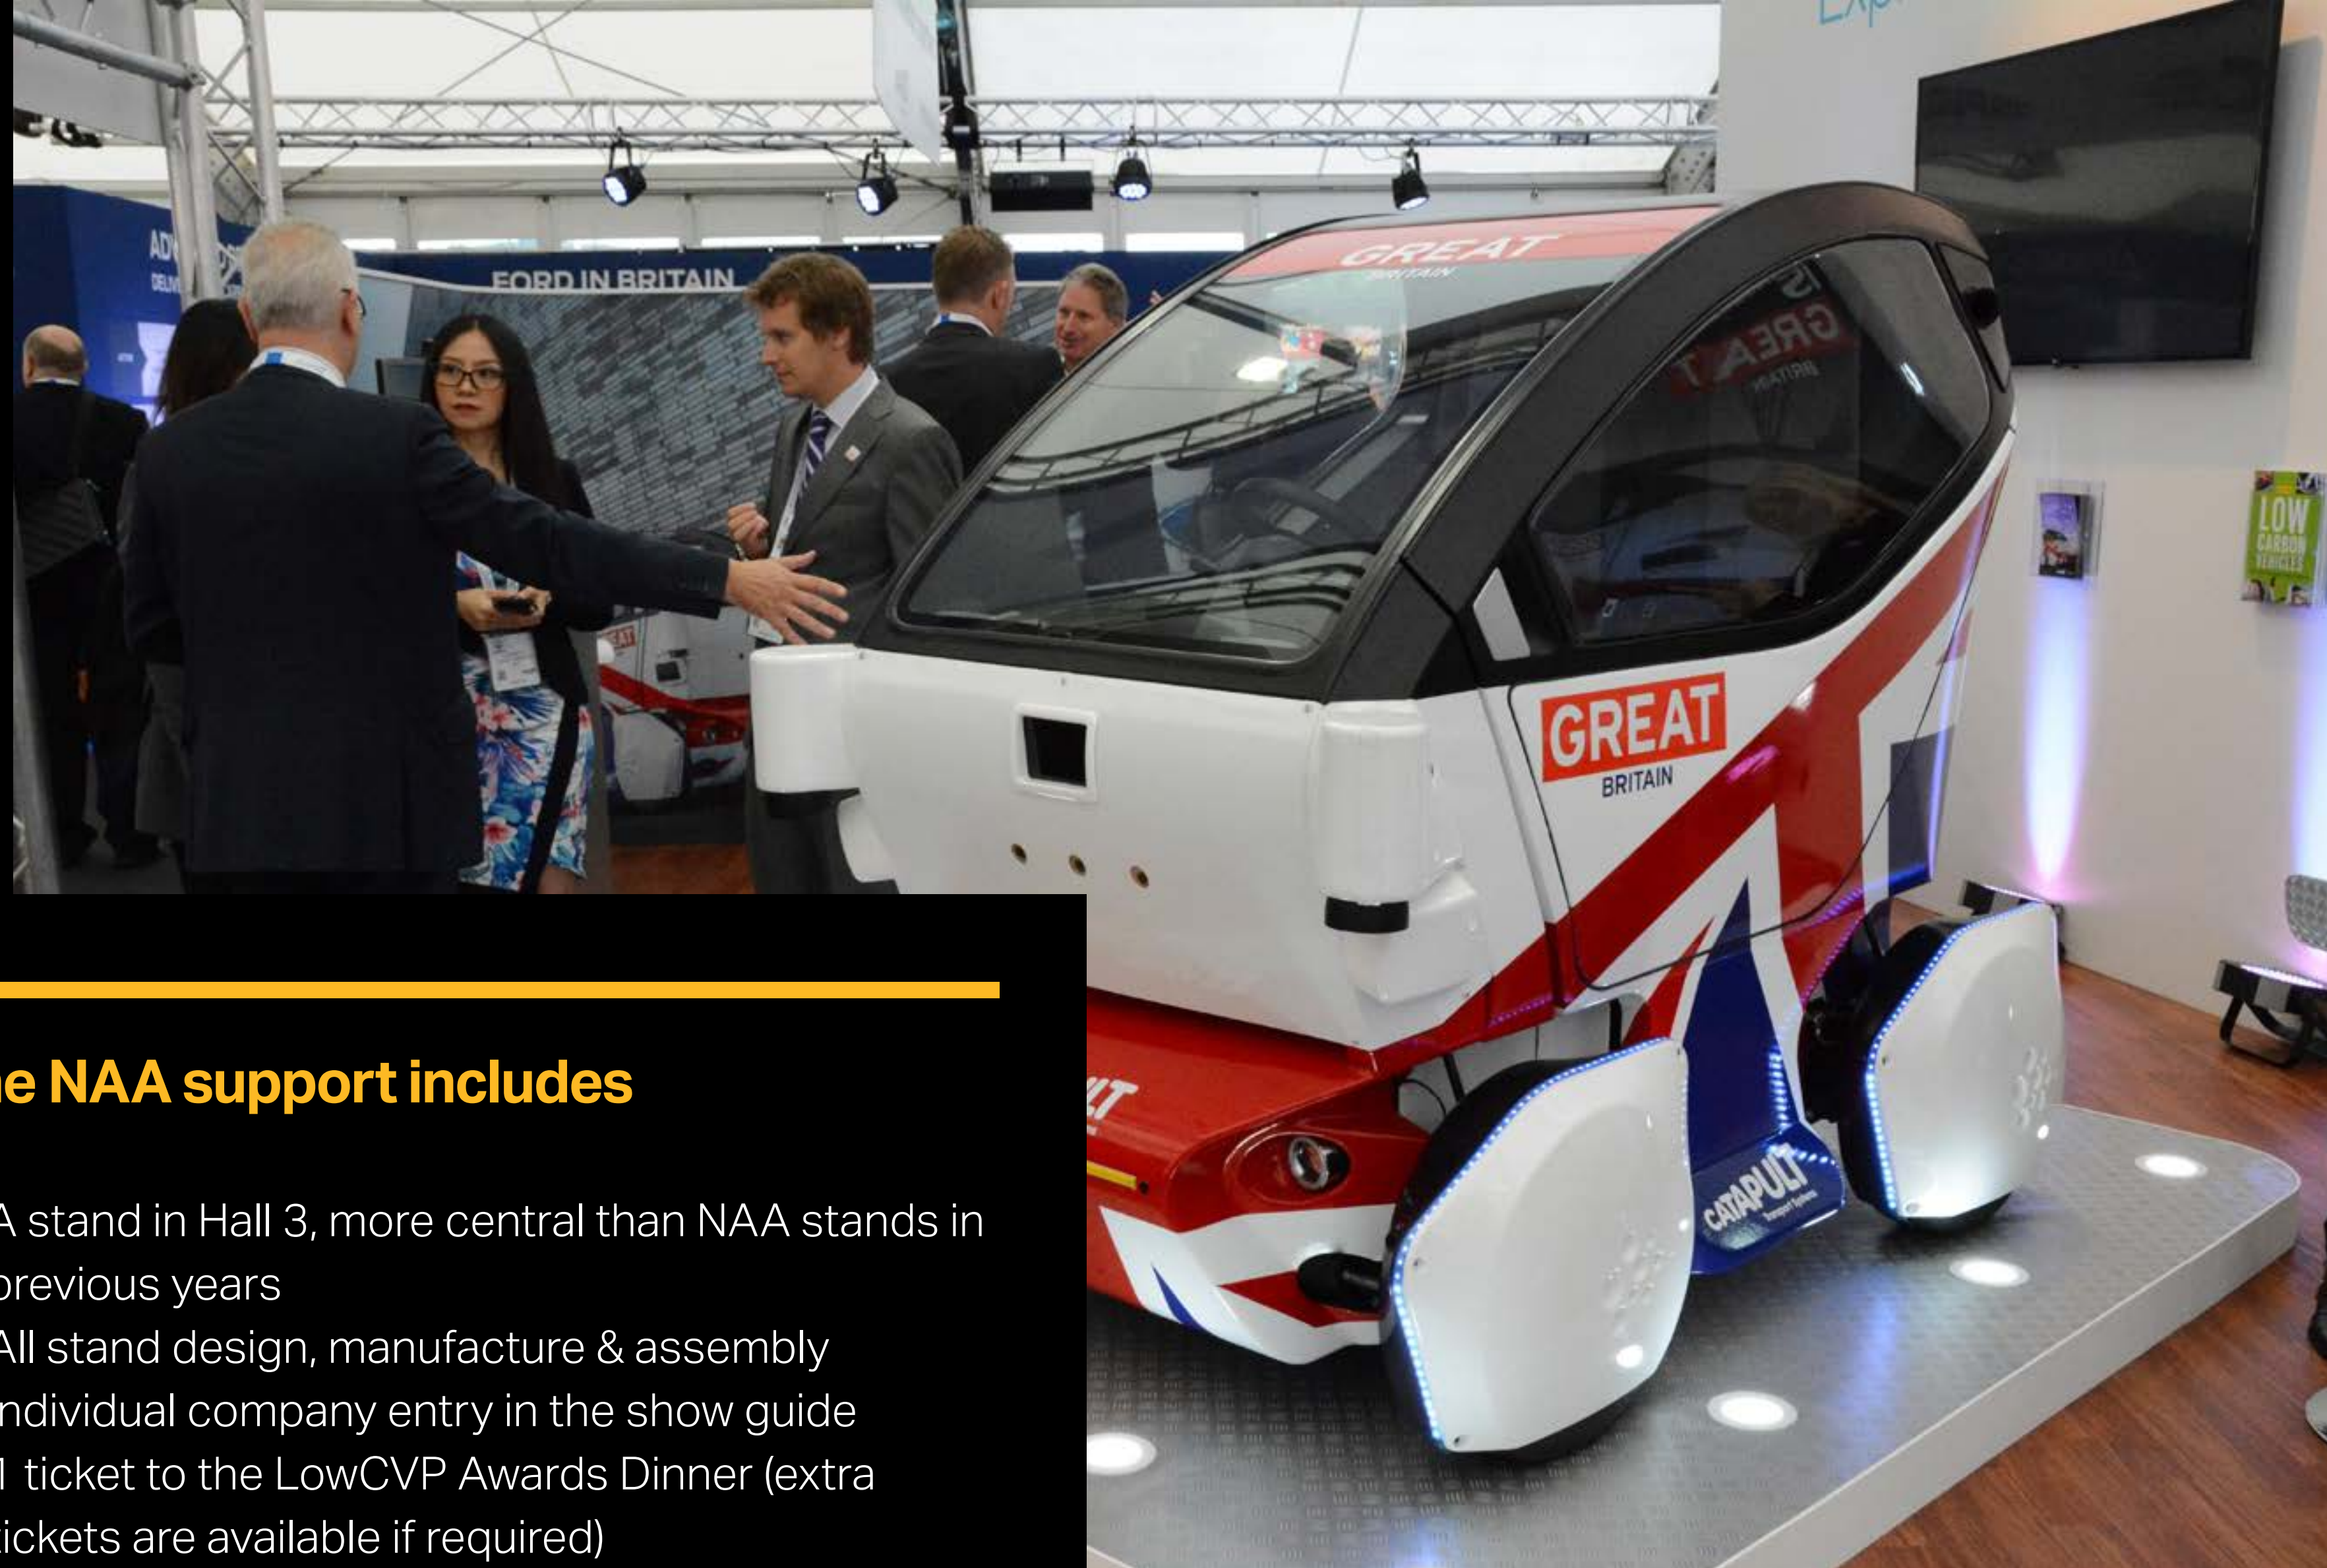

The NAA takes all the strain out of exhibiting by booking, designing and managing a stand which your company can share with others, so ensuring that exhibiting at LCV is extremely cost-effective.

LCV2016 consists of three key elements: a technology exhibition, seminars and 'ride & drive' opportunities of the latest low emission vehicles (and some prototypes). In addition, the Low Carbon Vehicle Partnership (LowCVP) Awards Dinner on the middle evening provides an ideal opportunity to network with key individuals in the low carbon vehicle sector.

Click here to see the review of LCV2015 including Robert Llewellyn's video of NAA companies

The NAA support includes

- A stand in Hall 3, more central than NAA stands in previous years
- All stand design, manufacture & assembly
- Individual company entry in the show guide
- 1 ticket to the LowCVP Awards Dinner (extra tickets are available if required)
- Stand visitor QR collection code
- Use of TV screen for company video/presentation
- Shared use of stand furniture
- Marketing support package including one-to-one expert advice about how to achieve the maximum outcome from your presence at the event.

Summary of LCV2015 statistics
